Key notes: Medical Latin, Neo-Latin Studies, Latin Language History, Medical Latin features, History of Medicine, Medical latin works through ages

Latin in Medicine International Conference is being held due to increasing interest of old prints, manuscripts and notes written by Medics through ages as well as medical latin features.

We are looking forward for papers touching issues never analysed before or scarcely analysed. We are interested in all works even lightly touching the medicine issues, describing work of medical services, health problems and many more.

As the Conference is being held in Poland and in association with Societas Studiis Slavo-Latinis provehendis in Bratislava all papers connected somehow to Slavs are also welcome.

A meeting of International Society of Slavic Neo-Latin Studies will take place during the Conference.
